Autodesk Architecture Solutions

AutoCAD

As the industry standard, AutoCAD® software provides the power and flexibility to help drive your projects from concept through creation quickly and efficiently. Visualize design concepts within a 3D environment, quickly and accurately document designs, and collaborate with clients and contractors to save time and money.

AutoCAD LT

AutoCAD LT® software incorporates the 2D drafting and detailing productivity features from AutoCAD software.

AutoCAD Architecture

AutoCAD® Architecture is the version of AutoCAD software for architects. Drafting and documentation is much more efficient with the software's intuitive environment and purpose-built tools for architects. Experience immediate productivity gains while learning new features at your own pace. Share and communicate designs easily with the DWG file format.

AutoCAD Revit Architecture Suite

AutoCAD® Revit® Architecture Suite turns maximum flexibility into competitive advantage. Combining AutoCAD software, AutoCAD Architecture software, and the benefits of the Autodesk Revit Architecture BIM application, your legacy software, training, and design data investments are protected, enabling you to move to BIM at your own pace.

Autodesk 3ds Max Design

Autodesk® 3ds Max® Design software supports the way architects and visualization specialists work: creatively, iteratively, and across multiple software applications. Autodesk 3ds Max Design is a powerful application for expanding the visual context of design concepts created with Autodesk Revit Architecture, AutoCAD Architecture, and AutoCAD software, for effective design validation and visual communication.

Autodesk Buzzsaw

Delivered on-demand, Autodesk® Buzzsaw® service helps you simplify and centralize all project-related documents and information, so you can successfully execute project plans based on timely decisions and accurate information.

Autodesk Design Review

Autodesk® Design Review software is a proven, all-digital process for accelerating architectural review cycles. It allows you to electronically review, mark up, and revise 2D and 3D designs, including tools to walk-through and cross-section your models, without altering the original file. Users can track and review changes and their status without waiting for printouts

Autodesk Ecotect

Autodesk® Ecotect™ software enables architects and designers to simulate and analyze environmental factors, such as solar radiation, shading, and daylighting, in the conceptual and detailed design phases to better understand how a building design will operate and perform. Autodesk Ecotect delivers powerful visual feedback using 3D displays within the actual context of your design to illustrate how fundamental criteria will affect building performance.

Autodesk Green Building Studio

The Autodesk® Green Building Studio® web-based energy analysis service can help architects and designers perform whole building analysis, optimize energy efficiency, and work toward carbon neutrality earlier in the design process. With faster, more accurate energy analysis of building design proposals, architects can explore options in the conceptual design phase and work with sustainability in mind to plan proactively and build better.

Autodesk Impression

Autodesk® Impression software enables you to quickly create compelling presentation-ready graphics directly from your DWG and DWF™ files, facilitating productive and meaningful design review sessions.

Autodesk Inventor

Autodesk® Inventor® software provides architects with a foundation for digital prototyping, producing an accurate 3D model that validates the form, fit, and function of a design to speed time to fabrication.

Autodesk Maya

Autodesk® Maya® software enables a sophisticated, flexible, and open environment for imagining and executing the most complex form-finding exercises.

Autodesk Navisworks

Autodesk® Navisworks® software solutions enable project design and building professionals to unite their contributions into a single, synchronized building information model. By enabling team members to reliably share, combine, review, and perfect detailed 3D design models of any size or format, Autodesk Navisworks solutions are at the heart of your BIM workflow.

Autodesk Revit Architecture

Autodesk® Revit® Architecture software works the way architects and designers think. Purpose-built for BIM, Autodesk Revit Architecture helps you capture and analyze early design concepts, and accurately maintain your vision through design, documentation, and construction. All changes are automatically updated throughout the project, so design and documentation stay coordinated and more reliable.
